

PNWJETAA Goes Pumpkin Picking

Description:

A family-friendly event that celebrates fall and the change of season. A local farm opens to the public with a wide variety of activities including a hayride, pumpkin patch, corn maze, and apple cannons. (It's very Washingtonian.)

Details:

Advertising was simple: a day, time of arrival, and meeting place! People flowed in and out of the main group as they liked. We reserved a firepit as a gathering place and area where everyone could snack and chat outdoors, with face masks and hand sanitizer for safety.

Tips:

- Seasonal outings in nature bring out the natsukashii of life in Japan. We plan at least one event each season to gather outdoors.
- Always bring more s'mores that you think you need. (We had plenty!)

Racial Equity & Social Justice Workshop

Dr. Mya Fisher

Description:

Led by Dr. Mya Fisher, a former JET and current Chief Executive and Transformation Officer of Global Equity Forward, this workshop was guided discussion and interactive introspection of how to build a leadership aware and prepared to stop inequity and injustice of various kinds.

Details:

Open first to the board members and active leaders in PNWJETAA, we hope to have additional workshops that will include candidates for interviewers in the JET selection process. We would like to ensure that personal biases of any kind are acknowledged and put aside in the interview process to ensure that all candidates are considered equally.

Tips:

- Before the workshop, we shared recommendations for books and movies, and had discussions about current topics and news.
- Mya used an anonymous survey to gather data specific to our chapter for her presentation, creating a personalized and focused discussion.
